If a Subfund invests at least 10% of its net assets as a fund of fund in target funds, a composite TER of the fund of funds is to be calculated as follows. The prorated TER of the individual target funds including a performance related remuneration, weighted according to the share they represent in the overall assets of the fund of funds as of the closing date and the TER of the fund of funds minus the retroceded commissions received from the target funds during the reporting period.

### 2.2 Calculation of the Net Asset Value

The Net Asset Value of the Shares is determined in accordance with the Articles of the Company by reference to prices obtained at the Valuation Point preceding the Valuation Day. The Net Asset Value per Share shall be expressed in the Reference Currency of the relevant Sub-Fund and is calculated in the case of each Sub-Fund by dividing the assets of such Sub-Fund less its liabilities (to include a provision for duties and charges) by the number of Shares in issue in respect of such Sub-Fund.

In the event of further Classes of Shares being created in a Sub-Fund, the Net Asset Value per Share of each Class of Share in a Sub-Fund is determined by calculating that portion of the Net Asset Value attributable to each Class by reference to the number of Shares in issue or deemed to be in issue in each Class on the relevant Valuation Day subject to adjustment to take account of assets and/or liabilities attributable to each Class.

### 2.3 Valuation principles

The method of establishing the value of any assets and liabilities of the Company as set out in the Articles provides the value of an investment which is quoted, listed or normally dealt on a Regulated Market, a stock exchange in an Other State or on any Other Regulated Market will normally be the last available closing price or quotation on such market as at the relevant Valuation Day (or, if no trading shall take place in that market on that Valuation Day on the last day on which trading in that market took place before that Valuation Day) for such amount and quantity of that investment as the Administrator considers to provide a fair criterion.

2.3.1 If an investment is listed or traded on a Regulated Market, a stock exchange in an Other State or on any Other Regulated Market, but acquired or traded at a premium or at a discount outside or off the relevant market, the Administrator may take into account the level of premium or discount at the date of the valuation.

2.3.2 If an investment is quoted, listed or normally dealt in on more than one Regulated Market, a stock exchange in an Other State or on any Other Regulated Market, the Administrative Agent will adopt the closing price or quotation on the market which, in the Administrator's opinion, provides the principal market for such investment.

2.3.3 Where in regard to any investment which is listed or normally dealt in on a Regulated Market, a stock exchange in an Other State or on any Other Regulated Market but in respect of which for any reason the closing price is unavailable at any relevant time or does not in the opinion of the Directors, reflect their fair value, the value thereof shall be the probable realisation value estimated with care and in good faith by a competent person approved for that purpose by the Administrative Agent.

2.3.4 The value of any investment which is not quoted, listed or normally dealt in on a Regulated Market, a stock exchange in an Other State or on any Other Regulated Market shall be the probable realisation value estimated with care and in good faith by a competent person approved for that purpose by the Administrative Agent.

2.3.5 The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.

2.3.6 The value of Transferable Securities, Money Market Instruments and any financial assets listed or dealt in on a Regulated Market, a stock exchange in an Other State or on any Other Regulated Market (as defined in the sales documents for the shares of the Company) shall be based on the last available price on the relevant market which is normally the principal market of such assets.

2.3.7 In the event that any assets are not listed or dealt in on any Regulated Market, any stock exchange in an Other State or on any Other Regulated Market, or if, with respect to assets listed or dealt in on any such markets, the price as determined pursuant to the above paragraph is, in the opinion of the Board of Directors of the Management Company, not representative of the fair market value of the relevant assets, the value of such assets will be based on the reasonably foreseeable sales price determined prudently and in good faith by the Board of Directors of the Management Company.

2.3.8 The Board of Directors of the Management Company may authorise the use of the amortised cost method of valuation for short-term transferable debt securities in certain Sub-Funds of the Company. This method involves valuing a security at its cost and thereafter assuming a constant amortization to maturity of any discount or premium regardless of the impact of fluctuating interest rates on the market value of the security or other instrument. While this method provides

## Notes to the financial statements (continued)

certainty in valuation, it may result in periods during which the value as determined by amortised cost, is higher or lower than the price the Sub-Fund would receive if it sold the securities. For certain short term transferable debt securities, the yield to a shareholder may differ somewhat from that which could be obtained from a similar Sub-Fund which marks its portfolio securities to market each day.

2.3.9 The liquidating value of futures, forward or options contracts not traded on Regulated Markets, stock exchanges in Other States or on Other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established prudently and in good faith by the Board of Directors of the Management Company, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on Regulated Markets, stock exchanges in Other States or on Other Regulated Markets shall be based upon the last available settlement prices of these contracts on Regulated Markets, stock exchanges in Other States or on other Regulated Markets on which the particular futures, forward or options contracts are traded by the Company; provided that if a futures, forward or option contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors of the Management Company may deem fair and reasonable.

2.3.10 Units or shares of open-ended UCITS and/or UCI will be valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the Board of Directors of the Management Company on a fair and equitable basis. Units or shares of a closed-ended UCI will be valued at their last available stock market value.

2.3.11 Interest rate swaps will be valued at their market value established by reference to the applicable interest rates curve. Index and financial instruments related swaps will be valued at their market value established by reference to the applicable index or financial instrument. The valuation of the index or financial instrument relating swap agreement shall be based upon the market value of such swap transaction established in good faith. Total return swaps will be valued on a consistent basis.

2.3.12 All other securities and assets will be valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors of the Management Company.

2.3.13 Values expressed in a currency other than the relevant Reference Currency will be converted into the Reference Currency at the latest available exchange rate.

2.3.14 In the event of its being impossible or incorrect to carry out a valuation of a specific asset in accordance with the valuation rules set out above, the Directors are entitled to use another generally recognised valuation method in order to reach a proper valuation of that specific asset, provided that the alternative method of valuation is approved by the Administrator.

2.3.15 In the absence of bad faith, negligence or manifest error, every decision taken by the Directors or their delegate in calculating the Net Asset Value of a Sub-Fund or the Net Asset Value per Share, shall be final and binding on the Company and present, past and future Shareholders.

The Company may enter into securities lending and borrowing transactions provided that it complies with the following rules:

- The Company may only lend or borrow securities either directly or through a standardised lending system organised by a recognised clearing institution or by a financial institution specializing in this type of transaction and subject to prudential supervision rules which are considered by the Regulatory Authority as equivalent to those provided by Community law.
- The securities borrowed by the Company may not be disposed of during the time they are held by the Company, unless they are covered by sufficient financial instruments which enable the Company to reconstitute the borrowed securities at the close of the transaction.
- The Company may borrow securities under the following circumstances in connection with the settlement of a sale transaction: (a) during a period the securities have been sent out for re-registration; (b) when the securities have been loaned and not returned in time; (c) to avoid a failed settlement when the Depositary fails to make delivery ; and (d) as a technique to meet its obligation to deliver the securities being the object of a repurchase agreement when the counterparty to such agreement exercises its right to repurchase these securities, to the extent such securities have been previously sold by the Company.
