2.1 Presentation of the financial statements

The financial statements of the Company are presented in accordance with Luxembourg regulations relating to Undertakings for Collective Investment. They are prepared in accordance with accounting policies generally accepted in Luxembourg.

2.2 Valuation of investment in securities

The value of the assets of the Company shall be determined as follows:

- 2.2.1 The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses,

Notes to the financial statements (continued)

cash dividends and interest declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.

2.2.2 The value of assets listed or dealt in on any Regulated Market and/or Other Regulated Market is based on the last available price.

2.2.3 The value of assets which are listed or dealt in on any stock exchange in an Other State is based on the last available price on the stock exchange which is normally the principal market for such assets.

2.2.4 In the event that any assets are not listed or dealt in on any Regulated Market, any stock exchange in an Other State or on any Other Regulated Market, or if, with respect to assets listed or dealt in on any such stock exchange, or Other Regulated Market and/or Regulated Market as aforesaid, the price as determined pursuant to sub-paragraphs 2.2.2 or 2.2.3 is not representative of the fair market value of the relevant assets, the value of such assets will be based on the reasonably foreseeable sales price determined prudently and in good faith.

2.2.5 The value of Money Market Instruments not listed or dealt in on any stock exchange or any Other Regulated Market and/or Regulated Market and with remaining maturity of less than 12 months and of more than 90 days is deemed to be the nominal value thereof, increased by any interest accrued thereon. Money Market Instruments with a remaining maturity of 90 days or less are valued by the amortized cost method, which approximates market value.

2.2.6 Units or shares of open-ended UCI will be valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the Board of Directors of the Company on a fair and equitable basis. Units or shares of a closed-ended UCI are valued at their last available stock market value.

2.2.7 All other securities and other assets are valued at fair market value, as determined in good faith pursuant to procedures established by the Board of Directors of the Company.

2.2.8 The Sub-Funds may enter into securities lending transactions, provided that the following rules are complied with in addition to the following conditions:

(a) The borrower in a securities lending transaction must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law;

(b) The Company may only lend securities to a borrower either directly or through a standardised system organised by a recognised clearing institution or through a lending system organised by a financial institution subject to prudential supervision rules considered by the CSSF as equivalent to those provided by EU law and specialised in this type of transaction;

(c) The Company may only enter into securities lending transactions provided that it is entitled at any time under the terms of the agreement to request the return of the securities lent or to terminate the agreement.

With respect to securities lending, the relevant Sub-Fund generally requires the borrower to post collateral representing, at any time during the lifetime of the agreement, at least 100% of the total value of the securities lent.

The value of all assets and liabilities not expressed in the Reference Currency of a Class or Sub-Fund is converted into the Reference Currency of such Class or Sub-Fund at rates last quoted by major banks. If such quotations are not available, the rate of exchange is determined in good faith by or under procedures established by the Board of Directors of the Company.

The Board of Directors of the Company, in their discretion, may permit some other method of valuation to be used if it considers that such valuation better reflects the fair value of any asset of the Company.

2.3 Net realised gains or losses resulting from investments

The realised gains or losses resulting from the sales of investments are calculated on an average cost basis.

2.4 Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the remaining period until maturity. Unrealised appreciation or depreciation resulting from outstanding forward foreign exchange contracts, if any, are recorded in the Statement of Net Assets.

Notes to the financial statements (continued)

2.5 Options

The liquidating value of option contracts traded on a stock exchange or on another Regulated Market is based upon the last available settlement prices of these contracts on stock exchange and/or Regulated Markets which the particular options contracts are traded by the Company; provided that if an option contract could not be liquidated on the day with respect to which assets are being determined, the basis for determining the liquidating value of such contract is such value as the Board of Directors of the Company may deem fair and reasonable. The liquidating value of options contracts not traded on exchanges or on Other Regulated Markets and/or Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established in good faith by the Board of Board of Directors of the Company, on a basis consistently applied for each different variety of contracts.

2.6 Futures

5 - Performance fees

The Management Company may receive a performance fee out of the assets of the relevant Sub-Fund.

The Management Company will charge an outperformance fee when there is a positive return compared to the benchmark; then the fee is calculated as follows: for each valuation period during which the calculated return is greater than that of the benchmark, an outperformance fee is deducted as set out in the table above.

The outperformance in the reference currency represents the difference between:

- the Net Asset Value per Share (the "NAVPS") on a particular day, including fixed fees (management fees, administration fees, subscription fees), but not including any provisions for cumulated previous outperformance fees;

and

- the theoretical composite indexed NAVPS on that same day including the composite index's performance and the effects of subscriptions and redemptions.

The outperformance fee is provisioned for on each NAVPS calculation date. Accounting for outperformance fee provisions includes both allocations and reversals, as a reversal could occur if the return difference calculated on a particular day is negative. Provisions are limited at zero (no negative provisions). When performance since the start of the Valuation Period is negative, provisions for outperformance fees are limited to a maximum of 1.00% of the Net Asset Value, except for OFI FUND-Euro Breakeven Inflation for which the maximum is 0.50%.

When calculating this return, by "valuation period" the Sub-Fund's fiscal year is taken into consideration. The calculation is reset to zero at the beginning of each fiscal year.

The Management Company has implemented a swing price mechanism and the performance fee is charged on the basis of the unswung NAV.

The weight on NAV of the performance fees charged on each share classes.

The outperformance fees rates by class of Share for each Sub-Fund, are set out in the following schedule:

1 EUR =	1.47650	SGD	1 EUR =	1.09100	USD

11 - Swing Price

Sub-Funds may suffer a reduction of their Net Asset Value ("NAV") as a result of direct and indirect transaction costs incurred due to the purchase and selling of underlying securities caused by the investors' subscriptions and redemptions requests. This is known as dilution. To reduce the impact of such dilution and protect the interests of existing shareholders, the Company has implemented a swing pricing mechanism where a Sub-Fund's NAV price is adjusted downwards or upwards in order to ensure that the cost of the underlying portfolio activity is borne only by those investors who ask the respective subscriptions / redemptions and not by the rest of the existing shareholders.

If one day of a NAV calculation the net amount of subscriptions / redemptions orders on all share classes exceeds a preset threshold, which is determined by the Management Company upon objective criteria and expressed as a percentage of a Sub-Fund's NAV, the NAV may be adjusted upwards or downwards respectively in order to take into account the costs of the adjustment attributable respectively to the orders for subscriptions / redemptions.

The NAV of each class of shares is calculated separately however any adjustment will have, in percent, the same impact on the total NAV of the Sub-Fund. The Management Company determines, on a regular basis, the costs and thresholds on the base of, amongst others, transactions costs, buy-sell spreads as well as any taxes applicable to the Company.

Notes to the financial statements (continued)

To the extent that this adjustment is related to the net balance of subscriptions / redemptions in the Sub-Fund, it is not possible to accurately predict whether such swing pricing will apply at some point in the future. Therefore, it is not possible to accurately predict how frequently the Management Company will make such adjustments. Investors should note that the volatility of the NAV may not only reflect that of the securities in the portfolio due to the implementation of swing pricing as explained before.

The Management Company may decide on exceptional cases (e.g. mergers, liquidations, launch of new Sub-Funds) to suspend the application of the swing price mechanism.

The Sub-Fund GLOBAL FUND - Ofi Invest ESG Global Convertible Bond is the only Sub-Fund submitted to swing price policy.

No Net Asset Values are swung as at 30 June, 2023.
